

# Appalachian Audubon

## Panama Birding Expedition March 2020

Panama is one of the most exciting birding destinations in the world. With almost 1000 bird species and a diverse array of habitats, visitors to this small Central American nation are sure to expand their life lists.

There are two locations in Panama with extremely high numbers of endemic species, the highlands of the Talamanca Mountains and the Darien Jungle. Our expedition will give you a chance to visit both.

*Join the Appalachian Audubon Society  
for the trip of a lifetime to Panama!*

**3 Options ~ Choose your Adventure.**
